

2/3S

Our recent highlights included the HASS excursion, where students enjoyed learning how laundry was done in the olden days, what school was like, and looking at old bikes. Year 2 also had a Street Science incursion and loved the science show and launching their rockets.

In class, we have been learning about the “zones” of emotions: Blue (sad, tired, low energy), Red (angry, upset, out of control), and Green (happy, calm, ready to learn). Students are encouraged to use the strategies that they learned to return to the Green Zone when needed.

Please continue to support your child by encouraging 15 minutes of reading each night and completing weekly homework to reinforce classroom learning.
