

2/3S

What a fantastic few weeks it has been in Year 2/3! Students have been busy exploring new topics and building on their learning across all subjects.

In Science, we have been investigating the life cycles of animals, discovering how different creatures grow and change from birth to adulthood. In Mathematics, we have been strengthening our understanding of addition and subtraction strategies and applying our reasoning skills to solve maths problems. During Literacy, students have been diving into the fantasy genre, learning how to create imaginative stories with detailed settings, interesting characters.

We have also been working on building positive classroom habits such as listening carefully, collaborating with peers, and showing kindness and respect in all that we do.

Encouraging regular reading and helping your child complete their weekly homework makes a big difference to their progress and confidence.

Important Dates:

31 October – Day for Daniel (wear red)

31 October – P&C Disco

7 November – G.A.T.E. ways

11 November – Remembrance Day Parade
