

2/3S

Students have been working hard on assessments in English and Maths, continuing to develop their persuasive writing skills and exploring arrays.

In Science, the class has been investigating forces – both contact and non-contact – through games and toys. Students are excited to design their own toys and games to explore these forces in action.

Please continue to encourage your child to read every day for at least 15 minutes, as regular reading makes a big difference to literacy development and overall learning.

Important Dates:

Thursday 28th August – HASS Excursion

3rd–4th September – Father's Day Stall (please send a bag for gifts and cash in a zip lock bag)

Friday 5th September – Student Free Day
